Commission review: sheet vs. app

Date: 9 Nov 2026 · **Source:** `LIST - COMMISSION.csv` (7 dentists), the live Commissions page, and the Nov 3 Transactions screenshot. **Method:** `scripts/audit-commission-sheet.ts` reads the sheet, then asks the app's own commission code (the same functions used when a visit is saved) what each dentist would earn on a sample payment. It only reads; nothing was changed in the live database.

Result in one line

398 sheet lines checked: **369 match, 35 are missing, 68 are paid differently, and 59 are for procedures that are not on the price list** (11 distinct procedures). Numbers are after the draft fix below; before it, 345 matched and 69 were missing.

Your screenshot rows

Row	Shows	Why	Fix
Permanent Filling (Anterior) ₱1,600 Cash	₱142.86	Correct: 10% of ₱1,600 ÷ 1.12	none
Ortho Adj ₱1,000 GCash	₱0.00	No tier rate exists for Ortho Adj. Bandayrel now has an individual 20%, which pays ₱200 (Ortho is paid on the full amount), but a saved row keeps the amount it was saved with	Add the tier rate, then run `yarn db:backfill-links`
Loss Bracket ₱500 GCash	₱0.00	The price list calls it "Lost Bracket", and it has no tier rate	Add the rate (89.29 for Bandayrel at 20%) and backfill
Pedia Handling Fee ₱500 GCash	₱0.00	Not on the price list and not on the commission sheet, so no rate can apply	Decide whether it earns commission; if yes, add it to the price list first

What is implemented and what is not

Implemented and matching: Consultation, OP (all four), Calcimol, Fluoride (Pedia Only), Temporary Crown, Ceramage Removal, Clasp for Maryland, Mouth Guard, Denture Repair, Plastic / Flexible / IVOCAP dentures, all Jacket Crowns, Emax / Zirconia veneers, Onlay Ceramage, Complicated Extraction, Bone Reduction, Teeth Whitening, X-ray pesos for cash (₱70 / ₱30), and HMO 10% on OP.

Not implemented (the app pays nothing):

1. **Ortho Adj**, **RCM**, **Lost Bracket**: no tier rate. The sheet gives them the Ortho rate (Teope 25%, Ayapana/Ahmad/Roldan/Bandayrel 20%, Banawa/Perez 15%).

2. **Cosmetic Filling**: no tier rate (sheet: Teope, Ayapana, Bandayrel 20%; Ahmad, Roldan, Banawa, Perez 15%).
3. **Flouride Varnish**: no rate (the sheet's Flouride is 10%). Only "Fluoride (Pedia Only)" has one.
4. **HMO 10% on PF, TF and Simple extraction**: the sheet's HMO 10% cell is merged over OP, PF, TF and Simple extraction. The app pays HMO commission on OP only.
5. **Anna Perez, Temporary Filling (cash)**: her individual rate is 0% cash plus ₱250 HMO. This overrides the tier, so she earns nothing on cash TF; the sheet says 10%. This looks like a mistake.
6. **Not on the price list at all:** Build Up, Coronectomy, Esthetics Filling, Expander, Gingivectomy, High Impact Plastic Dentures, Thermosens Dentures, Twin block, TMJ Adjust, TMJ Down payment, Transcranial Xray (HMO ₱50), and Pedia Handling Fee.
7. Sheet items with no equivalent yet: Reservation Fee, Rush Fee, Suture, TMJ Package, Porcelain dentures and similar earn nothing; they are not on the sheet either.

Paid differently (the app follows the newer tier sheet, not this one): RCT, Post & Core, Post & Build Up (sheet 20% for Tier 2 / 1, app 15%), Direct composite veneers and Surgery (app 25% for Tier 3, sheet 20% / 15%), Ortho items for Banawa and Perez (sheet 15%, app 20%), Ayapana (sheet 20%, app 25%), and the Panoramic X-ray on HMO (sheet ₱50, app ₱70). Maria Dayandante is not on this sheet.

Draft fix (not run)

`scripts/sql/2026-11-commission-gaps-DRAFT.sql` adds tier rates for Ortho Adj, Sanitation + Ortho Adj, RCM, Lost Bracket (25 / 20 / 20), Cosmetic Filling (20 / 15 / 15) and Flouride Varnish (10 / 10 / 10), with an optional commented block for HMO 10% on PF / TF / Simple extraction. It was tested only on a copy of your data. After you run it, run `yarn db:backfill-links` to re-price saved rows.

Decisions needed

1. Which sheet is final: this per-dentist one or the tier sheet? They disagree on the "Paid differently" items.
2. The rates for Ortho Adj, RCM, Lost Bracket and Cosmetic Filling (the draft numbers are suggestions).
3. Should HMO pay 10% on PF, TF and Simple extraction, as the merged cell suggests?
4. Should Perez's Temporary Filling cash be 10% (remove the 0% override)?
5. Should Pedia Handling Fee earn commission? Which of the 11 missing procedures should be added to the price list?
6. Still open from earlier: "commission counts even if not Cleared, but only for HMO payments". Say if you still want that built.
